Other Business – Time Standard Revisions for 2025 & Beyond

The Tech Committee received an update from the AG Chair on time standard changes for 2025-2026. No official recommendations have been made. The Tech Committee will address this issue formally in the New Year once the AG Committee has put together their official recommendation for changes.

At this time, the leading candidate for change likely to occur will be the expansion of the current Age Group Bonus Cut system to include either 100s or 200s as bonus events.
